Subject: IRIS Chemical fact sheets for tomorrow's briefing

Hi Kelley,

I've attached a number of AO factsheets from the IRIS Program to this email in preparation for tomorrow's monthly IRIS update briefing for Arvin with Bob Kavlock (from 4-5PM on Sept 9). Many of these you've seen before, but we've updated all of them to be consistent with recent feedback from the ORD IO. Some of these fact sheets are also associated with preliminary materials we intend to release before the end of September, and would occur before the next monthly briefing. Here's a list of the factsheets we've included:

Materials already released:

Diisononyl phthalate (DINP) – preliminary materials will be discussed at the October 29-30 public science meeting
Chromium VI, Part 2 (CrVI) – second set of preliminary materials, describing human and mechanistic studies, will be discussed at the October 29-30 public meeting

Current assessments under review:

Ex. 5 Deliberative Process (DP)

Upcoming releases:

Ex. 5 Deliberative Process (DP)

Hopefully we won't be flooding you with fact sheets in the future, but with some of the scheduling differences in the last month or so, we wanted to make sure you had current background information on the assessments that are currently in motion. If you have any questions, feel free to contact me. Thanks much.

-Lou
